

## Metalon® Conductive Inks for Printed Electronics

[www.novacentrix.com](http://www.novacentrix.com)

### Metalon® JR-700HV

#### Carbon Ink – Aqueous dispersion for Inkjet Printing

**JR-700HV** is a resistive ink designed to be printed on a variety of porous and non-porous substrates including Novele™, polycarbonate, PET, polyimide, metals, and glass. The ink can be thermally cured or PulseForge® processed. The JR series of inks is formulated for compatibility and stability with various printheads including those manufactured by Dimatix and Xaar. Printing waveforms are available by request.
